

# Building a community machine learning tool for agriculture and forest species identification

António Sá Marques Ferreira

# Fun facts:

- Europe has world dominance in production, consumption and exports of wine
- Portugal has a long tradition in the production and export of wine
- Being Douro the first demarcated and regulated wine region in the world

The farmer  
needs to **KNOW**

# Current Challenges

- Manual work done by instinct and experience
- Specialists growing older
- Slow and expensive process

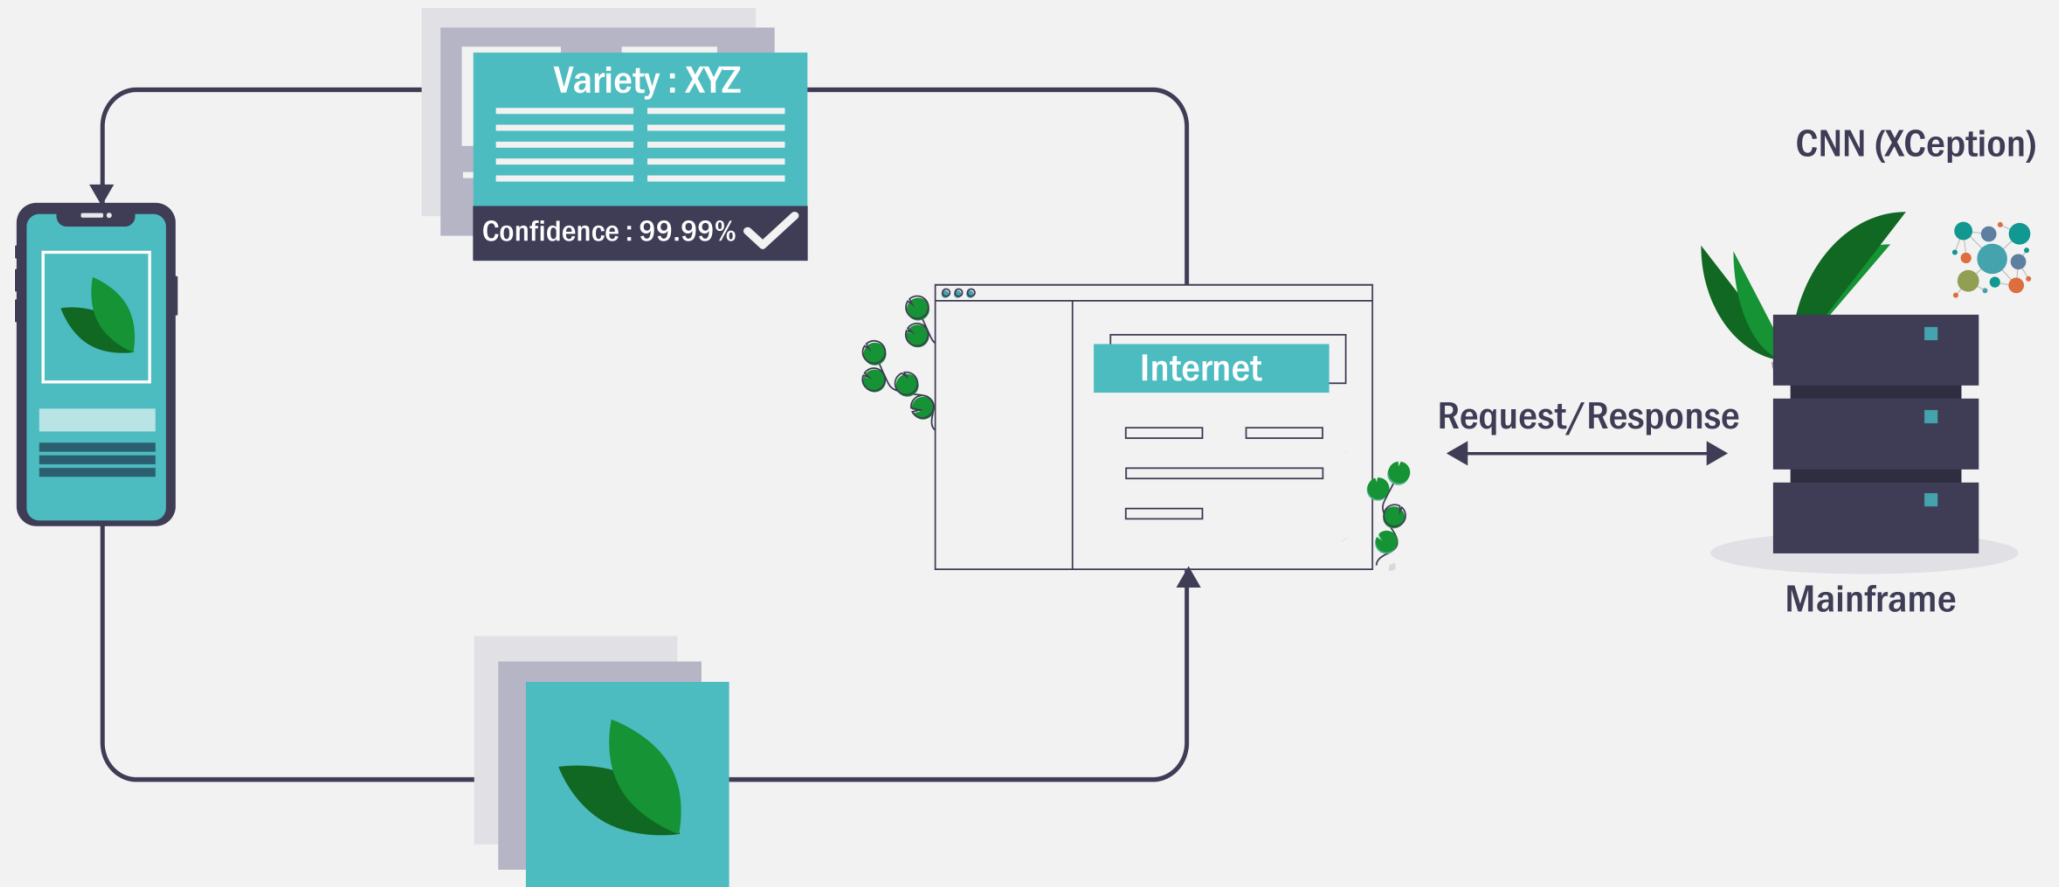

# The Solution

- Quick
- Easy
- Simple

# The Solution, how?

# Some boring data:

- Processing speed boosted by two paired graphic cards  
NVideo Quadro
- 60% training / 30% validation  
10% testing (dataset partitions)

# Current State

- Under development
- Six species (Important for the Douro's Region)

# Happy Farmer

- Easy tool
- Certified vines
- Quickness
- Cost-effectiveness
